FGNMHS SENIOR HIGH SCHOOL

Grading, Attendance, Forms & Awards System

How to deliver it to the faculty · presenter's copy · faculty meeting with the School Head

SAY THIS FIRST, AND SAY IT AGAIN AT THE END *"Your class record does not change. What changes is where the final number goes after you have worked it out — and everything after that: report cards, SF2, SF4, honours."*

BEFORE THE MEETING — fifteen minutes, done in the room you will present in

- **Sign in on the projector** and leave it on the Dashboard. Check the footer line: it tells you whether the version on screen is really the current one.
- **Put paper in their hands.** A printed SF9 and a printed term card, passed around, convince faster than a screen does.
- **Check Users & Roles for who still has no account,** so you answer a raised hand with a name and a date, not with "we'll see".
- **Test the connection from a phone.** The laptop is on cable; the faculty will be on the same Wi-Fi the room actually has.
- **Agree who opens and who closes — the School Head does both.** Adoption follows authority, not features.

RUNNING ORDER — thirty minutes

3 min	**School Head**	Opens. From Term 1 this is the school's record of grades and attendance. Names the deadline out loud.
2 min	**You**	What does NOT change: your own class record, your own computation, your professional judgement.
8 min	**You**	Live demo: sign in → Gradebook → encode three grades → Save → Submit. Leave one cell blank on purpose and show that it stays blank.
5 min	**You**	Live, adviser's view: mark a month's absences, save, follow the green note to finalize and print its SF2, print one term card, print a whole section's SF9 in one file.
4 min	**You**	The three safeguards, on screen: a blank is not a zero; the Audit Log naming who changed what; a finalized record refusing to be edited.
5 min	**Floor**	Questions. Use the answers below — short, then stop talking.
3 min	**School Head**	Closes with the three asks, the date they are due, and who to go to when something is wrong.

PROMISE THESE THREE — and refuse these three

SAY PLAINLY — all three are true

- **One number per learner, per subject, per term.** The system does not want your Written Work / Performance Task / Exam breakdown.
- **Nobody overwrites anybody.** Two teachers can encode the same class at the same time and neither entry is lost.
- **A mistake can be fixed.** The correction is recorded with your name and the reason — that protects you as much as it protects the record.

DO NOT PROMISE — all three will be tested

- **It does not replace your class record.** Keep it. It is how you show your work.
- **It does not work offline.** No internet, no encoding — encode later, nothing saved is lost.
- **It is not finished.** The separate checking step and Grade 12's Term 2 and Term 3 subject lists are still being completed.

QUESTIONS YOU WILL BE ASKED — answer in one breath, then stop

Will it compute my grades for me?	No. You compute them exactly as you do now. You encode the one official number.
What if I type the wrong grade?	Edit it. It drops back to DRAFT, you press Submit again, and the change is logged.
Who else can see my grades?	That section's adviser, the Registrar, the School Head and the ICT Administrator. Not other subject teachers.
A learner has no grade yet — do I put 0?	Never. Leave it blank. Blank means "not yet"; 0 is a real grade and it can cost a learner an award.
I got signed out / the internet dropped.	Nothing saved is lost. You are signed out after 60 idle minutes — press Save before you step away.
My class is not in my Gradebook.	Nobody has assigned you to it yet. Your section's adviser can do it in a minute on Teacher Assignments.
Do I still keep my class record?	Yes. The system holds the official number; your record shows how you arrived at it.
Can I use my phone?	Yes, it is the same app — but encode a whole class on a PC.

CLOSE BY ASKING FOR EXACTLY THREE THINGS

1 Sign in today.
Set your own password. The one handed to you has been read by someone else, so it is not yours until you replace it.

2 Report a missing class.
Tell your section's adviser the same day — they can fix it themselves, without waiting for the ICT Coordinator.

3 Encode Term 1.
Term 1 closes on 15 September 2026. After it closes the term is read-only for everyone.
